Protection against Theft

Accessories/jewellery/small-format exhibits stolen in passing...

Take advantage of our security experts and security services to keep your small-format exhibits under surveillance protecting them from unauthorised access.

You have the option to order security guards through our authorised security service provider for deployment times > 5 hours. Factor security into your trade fair appearance.

Based on our experience we recommend specific periods where investment in the security and surveillance of your exhibition stand makes sense:

■ Stand construction

... the last few hours before your trade fair appearance, your stand is fully equipped with all your exhibits. There is a hustle and bustle in the exhibition halls. Do not leave your exhibits unattended after completing your stand construction and fitting!

Order security experts for this period!

■ If you have small exhibits, jewellery items or accessories, we recommend **protecting your stand against theft** by using the professionals of our security service companies **for the duration of the exhibition**.

■ **For the dismantling period** at the end of the event the situation in the exhibition halls is similar to that of stand construction ... busy, ungovernable activities.

Invest in security here.

I am pleased to advise you on planning in this sensitive field!
